

Mathematical moments with 3 & 4 year olds
The number snake: recognising numerals

DJ loves playing outside and visiting the local park. Whilst there with his mother, he spotted the number snake shown here. He has always enjoyed looking at and naming numbers, so was drawn to this number track. His mum called out numbers for him to find, which he did, showing his skill in recognising the numerals while enjoying running and standing on them. [Click here to watch the video.](#)

After this, Mum suggested that DJ jump on all the numbers, starting from 1, saying each number after each jump and then going back from 10 to 1 again.
