

Number books

This list of number picture books is grouped according to a main focus on either Numbers to 10, Bigger numbers or Composition. For each book we have identified some key maths ideas which could be developed, such as number order or cardinality. The terms used are explained <u>below</u>*. Most books provide opportunities for developing a range of maths topics, including some more advanced ideas than mentioned here. We have suggested age ranges from two to seven years: the number focus might vary according to the age and experience of the children and young children will be excited by bigger numbers than they understand fully. Finally, we also offer some Guidance for using the books to develop mathematical understanding, including useful links to other sites and lists.

Some of these books may be out of print, but are available second hand or from library services. You can view the books via the YouTube links provided, or by accessing <u>https://archive.org</u>. Please note that some YouTube videos are preceded by adverts which may not be suitable for children.

Books focusing on numbers to 10		Description	Developing the maths
1.2.3 Distributions Distributi	1, 2, 3 to the zoo Eric Carle 2 to 5 https://www.youtube.com /watch?v=9n9SAspDXO Q	A wordless number book, with just the numerals and collage illustrations of 1 to 10 different animals.	Counting and cardinal number values to 10 Numerals Ordinality - number order Subitising Composition The opportunities for children to count animals from 1- 10 become more challenging with irregular arrangements of e.g. wriggly snakes. Children can connect the number counted with the numeral on each page, saying the word and showing numbers of fingers.There are also opportunities for subitising, including conceptual subitising of animals, grouped spatially or by kind: children can discuss how numbers are made up.

			Counting and cardinal number values to 10
	1, 2, 3 what can you see	A simple picture book	Ordinality - number order
	in Autumn?	about a squirrel and a	Subitising
1,2,3 what	Annie N.	hedgehog finding	
can you see		numbers of autumnal	The numbers of items are arranged in familiar ways to
A Lot in Automa 2	2 to 5	things, like acorns and	encourage subitising.

		Children could use their 10 fingers to see how many
		cockatoos are missing in each room.
	Abigail Catherine Rayner 3 to 5 https://www.youtube.com /watch?v=efue8y2fg98 Cockatoos Quentin Blake 3 to 6 https://www.youtube.com /watch?v=i6UGICkZTKk	Abigail Catherine RaynerAbigail the giraffe tries to find things to count which stay still. Her animal friends try to help, but miss out numbers. Abigail teaches them to count.Match?v=efue8y2fg98Professor Dupont has 10 cockatoos who decide to hide from him. In each room we can search for and count progressively more cockatoos (although Prof Dupont doesn't see them).

Count with Maisy, Cheep Cheep, Cheep!	Count with Maisy, cheep, cheep, cheep! Lucy Childs 2 to 4 https://www.youtube.com /watch?v=m-vPJLuSOwI	A lift-the-flap book. Mommy Hen searches for her 10 chicks at bedtime, with Maisy's help. Many other Maisy books in the series include counting.	Ordinality - number order: counting to 10 Numerals Cardinal number values One more As each chick is found, it is counted and the numeral is shown. The growing number of chicks and numerals is repeatedly shown, encouraging recounting. You could ask, <i>What number will come next, what came before?</i> or deliberately say the wrong next number, for children to correct.
DOBSS COLORFUL DAY A Massiry Story along Colors and Counting OO DO Emma Dodd	Dog's colourful day Emma Dodd 4 to 6 <u>https://www.youtube.com</u> /watch?v=PE0s9QUTfvY &t=65s	Dog always seems to be underfoot when something messy (and colourful) is spilt, giving readers ten different coloured spots on his white coat to count before Dog's bath. Recalling what caused each colour spot could be a memory game.	Counting and cardinal number values to 10 Ordinality - number order: one more Numerals This provides lots of opportunities for counting to 10. Number words are used, providing opportunities to match with numerals - until Dog's owner counts the colourful spots at the end of the book. There is also the opportunity to talk about 'one more' and predict the number of spots as they increase by one on each page.

			Counting and cardinal number values to 10
	Elmer's first counting		Ordinality - number order

Form 123	<u>0</u>	all the animals 1-10.	You could provide a selection of small world farm
Pad Camaball			animals with picture cards and numerals to match - and
Rou Campoen			invite children to find some that are missing.
			Picture number cards could also be used at tidy up
			time: There should be 3 pigs. Do we have 3?

FEAST 10	<i>Feast for ten</i> Cathryn Falwell 3 to 5 <u>https://www.youtube.com</u> /watch?v=bH5S-JR_Kws	Shopping and cooking with an African American family. Collage illustrations with numerals. The sequence 1 to 10 is repeated in the things to buy and the stages of preparing the meal.	Counting and cardinal number values to 10 Numerals Subitising Composition Things to count are scattered and grouped on the pages. This encourages checking to find the number of items, emphasising cardinal values for numerals. Children can discuss how they see the numbers grouped e.g. four pans on the stove and two in the oven, involving subitising and composition of numbers.
THANDAS HEN ELCON FRONT	Handa's hen Eileen Browne 3 to 5 <u>https://vimeo.com/60866</u> 124	Handa and her friend hunt for Mondi, the missing hen. They discover numbers of different creatures until Mondi and her 10 chicks are found.	Counting and cardinal number values to 10 Numerals Subitising Composition Ordinality - number order This involves counting groups of 1 to 10 creatures as the children look for Mondi the hen. Images are random and linear, encouraging subitising. "When I read this in my class, the children loved to look at the images of the animals and this encouraged some great number language with the children using their conceptual subitising skills. One little boy said 'I can see 9 birds there because I can see 4 and 4 and then one more'. This could be explored further by the children making up their own number stories, acting it out with small world animals or drawing their own stories with animals up to 10." (Reception teacher)

HOW Scorpe	How scary! Bernard Lodge 2 to 5	Meet a different number of hairy, scary and ferocious creatures on each page until you reach the surprise on the	Counting and cardinal number values to 10 Numerals Subitising Composition Ordinality - number order
	/watch?v=zCuRv7LphAA	last page.	to 10. The number word and matching numeral are displayed throughout. It is challenging to count and keep track of things arranged irregularly on the page - particularly on the last spread. There are opportunities for subitising, and talking about number composition.
		This is a quirky and	Subitising
	How to count to ONE	funny book: each	Cardinal number values
	Caspar Salmon and Mall	page shows a different	Despite being told to spot just one thing hidden in the
HOW TO COUNT	3 to 5	children are challenged to ignore those numbers and	picture, children will inevitably subitise or be tricked into counting 2, 3 or 5 things. They could match these with numerals or fingers.
A ONE O	https://vimeo.com/68325 3011 (introduced by	find the one thing mentioned.	The end spread has all 100 objects from the book,
┢╸≜҇҇҇ӑ҇¥҄҉҂҉҇҆҆҆҆	author) https://www.youtube.com /watch?app=desktop&v=j WhharWL5F4		which might prompt some children to count to check

ISPA EXAMPLE COMPANY C	<i>I spy numbers</i> Jean Marzollo & Walter Wick 3 to 7 <u>https://www.youtube.com</u> <u>/watch?v=wtxOBIYyQ4E</u> Also entitled 'I Spy Little Numbers'.	Photos of collections of extremely varied items representing each number from 1 to 9. Things often show the number in surprising ways: e.g. three holes in the fish slice.	Counting and cardinal number values to 9 Numerals Subitising Composition Children can count and subitise – and will sometimes need to search to see how each object represents the number on the page e.g. by having 3 wheels, 3 colours or 3 holes. Different arrangements prompt subitising and discussion about composition: e.g. a 7 domino has 5 dots and 2 dots. A group of children could make their own collection of things representing a number.
LOO QUEUE DE LO COLORIZACIÓN Nicholas Allan	Loo queue Nicholas Allen 2 to 5 <u>https://www.youtube.com</u> /watch?v=CW64ef0wg7g	A variety of anxious animals join the queue for the loo, one by one, numbered from 1 to 10. They are all of different colours and a clue to the next animal can be seen through the window.There is a surprise ending!	Ordinality - number order to 10 Numerals Counting and cardinal number values This is useful for providing an example of numbers used both ordinally (identifying position) and cardinally (identifying the total in the queue so far). Children could mix up and re-order a numbered queue of toys or people.

My Garden is a Square	My garden is a square Barbara Schindelhauer & Mark Hansen 3 to 6 <u>https://www.youtube.com</u> <u>/watch?v=5idrZO0sPrI</u> Story from 2:45 to 10:44 Available in several different languages.	This rhyming book is about Numberland, where numbers like 4 have a house with four windows and a square garden. Trickster removes some items and Numberilly helps to put things right. Let's visit Numberland: https://www.numberla nd.net/	Counting and cardinal number values to 10 Numerals Ordinality - number order One fewer Children can count numbers of windows, sides of the garden and other items linked to a number. Children enjoy making their own version of Numberland, using recyclable materials. They can suggest items that belong in each garden: e.g. a cow could belong to Number 1 because there is one cow with one tail, or to Number 1 because it has 4 legs. After creating Numberland, a child can act as Trickster, removing (or adding) things, and others can act as Numberilly to make the numbers right.
One Bear [°] at Bedtime	<i>One bear at bedtime</i> Mick Inkpen 2 to 5 <u>https://www.youtube.com</u> /watch?v=jra1IQyhY0M	A little boy thinks that he only needs one bear at bedtime, but of course he needs all sorts of other animals.	Ordinality - number order to 10 Counting and cardinal number values Numerals Children can count up to 10 to find 'how many' in the set of animals on each page. The numeral is also displayed on each page to match to the set. You could ask, <i>How</i> <i>many will be on the next page? How many were on the</i> <i>page before? How many will be on the last page?</i> The final page is the opportunity to count all the sets of animals - and children could be encouraged to do this in order (either forwards from 1 or backwards from 10)

One Fox A COUNTING ADDA - POLLA Read	One fox: A counting book thriller Kate Read 3 to 5 https://www.youtube.com /watch?v=2fvf6PFzISo	The fox is hunting hens, with lots of suspense - but the hens win in the end, showing strength in numbers (100 hens). Children often feel sorry for the fox when they discuss the ending!	Counting and cardinal numbers to 10 (and 100) Subitising Ordinality - number order Numerals Composition There are different things to count on each page, up to 10, including actions and sounds (silent steps and knocks). Objects are grouped, e.g. 8 eyes belong to three hens and the fox, providing opportunities to discuss composition. At the end, there are 100 hens
One Gorilla A Counting Book	<i>One gorilla</i> Anthony Brown 2 to 5 <u>https://www.youtube.com</u> /watch?v=d1AUgf737oc	A vivid and beautifully illustrated presentation of primates, in groups to 10 - including gorillas, gibbons, macaques, mandrills, ring-tailed lemurs and spider monkeys.	and 1 fox, showing what a big number one hundred is.Counting and cardinal number values to 10NumeralsOrdinality - number orderWith a large, clear numeral and matching image on each double page spread, this is a clear and simple counting book.Children can count each group and predict how many there will be on the next page.

One Smiling Grandma	One smiling grandma: A Caribbean counting book Ann Marie Linden Illustrated by Lynne Russell. 3 to 5 https://www.youtube.com /watch?v=e7v7qWZ_ozl In this video a family read the book, and numerals appear on the screen	This is a simple counting book with rhyming text, illustrating contexts from the Caribbean	Counting and cardinal number values to 10 Ordinality - number order Subitising Composition This shows 1 to 10 objects that might be found in the Caribbean. There are no numerals shown, so children could find these and/or hold up fingers to match the numbers. They might predict and check how many there will be on the next page. There are opportunities for subitising and discussing number composition eg. 6 market ladies are in 2 groups of 3; 9 coconuts shown as 1, 2, 3, 2 and 1.
Presenter of Recourses JULIA DONALDSON ONCE TED FALLS out of BED New York ANNA CORES	One ted falls out of bed Juia Donaldson Illustrated by Anna Currey 2 to 5 <u>https://www.youtube.com</u> /watch?v=LztOHJCQNtk	This is a counting story with a narrative. One teddy bear falls out of bed. He plays with different numbers of other creatures and toys, then builds a staircase to get back on the bed- but the staircase falls down!	Ordinality - number order: counting to 10 and back Cardinal number values One more The numbers of things increase by one each time, and then they appear in descending order. Children could match numbers with numerals. They could count from one to ten and then back from ten to one, predicting the next number. With a number staircase image, children could count up and down, and you could ask, <i>Where is 6? What is</i> <i>before 6? What is two after 6?</i>

			Counting and cardinal number values to 10

TERRIBLE DINC SAURS DALL STIERLAND	Ten terrible dinosaurs Paul Stickland 4 to 6 <u>https://www.youtube.com</u> /watch?v=bifWmOTJ0	The rhyming text encourages children to join in, as dinosaurs disappear one at a time, and to predict and check which dinosaur has gone from each new picture.	Ordinality - number order: counting back from 10 Cardinal number values Numerals One less / subtracting one Children could act out the story using 10 dinosaurs. A staircase image shows 1 to 10 dinosaurs: children could make their own staircase patterns with toys. Once children have created a staircase pattern, they could spot an error (a duplication, a deletion or a swapping of the 'steps') or re-order jumbled 'steps'.
The HULETS in NONE UP MUMBELE 0123	The Hueys in none the number Oliver Jeffers 2 to 5 <u>https://www.youtube.com</u> /watch?v=BR1KmXwbN Rc	This humorous book tries to relate none to the other cardinal numbers and provides quirky images for numbers to 10.	Counting and cardinal numbers from 0 (none) to 10 Numerals Ordinality - number order one more The big idea in this book is that none (or zero) is a number. The characters discuss ideas of one more (and one less) and count up various objects from 0 to10.

Two Ways Document of the Brane Medianaly	Two ways to count to ten, A Liberian folktale Ruby Dee 3 to 6 <u>https://www.youtube.com</u> /watch?v=FchJYZR2j8g	A folk tale about animals competing to become king of the jungle when King Leopard dies. Animals must fling a spear into the air and count to 10 before the spear falls.All the animals count in ones, until one of the animals counts in twos.	Ordinality - number order: counting to 10 Counting in 2s to 10 This is about reciting the number sequence, in ones and in twos. Children could count forwards - and backwards- in twos, perhaps counting pairs of hands, feet or ears. You could set them other counting challenges, e.g. counting forwards and back in ones from different starting numbers, counting in twos starting from 1, counting fingers of a group of children in 5s or 10s. Children could also show the number sequences using numerals.
We All Went on Seferi A Counting Journey through Tanzania Interfedence Inter Calling Torrest Setter - Inter Calling	We all went on safari: A counting journey through Tanzania Laurie Krebs Illustrated by Julia Cairns 4 to 6 <u>https://www.youtube.com</u> /watch?v=0hgW3UMaYjc	A rhyming story of a group of Maasai children going on a journey. They count the animals they see in both English and Kiswahili.	Counting and cardinal number values to 10 Ordinality- number order Numerals One more On each page there are different animals and one more until there are ten: children could predict the number on the next page. This introduces the Kiswahili words to ten as well as the English words and these are shown with numerals and dots on the final page. Children could share counting words in other languages, perhaps with help from their families.

		Ordinality - number order: counting to 10

AN ORESTNAL LAURENT DE BRUNHOFF BOOK BABARS Counting Book	Babar's counting book Laurent de Brunhoff 3 to 6 <u>https://archive.org/</u>	A simple counting picture book with numbers of things to 10, but including a spread showing 11 to 20 of different kinds of animals and a certificate for counting to 20 (from Babar king of elephants).	Counting and cardinal number values to 20 Numerals Ordinality - number order Composition As well as having clear pictures with numerals and number words, this also presents numbers 11 to 20 in the final spread. These are split into '10 and some more', with e.g.'10 + 8' alongside a line of antelopes followed by '18' and 'eighteen'. The groupings of pictures up to 10 are irregular, providing opportunities to discuss the composition of these numbers.
PARADE PARADE PARADE PARADE PARADE PARADE PARADE PARADE	Bats on parade Kathi Apelt Illustrated by Melissa Sweet 6+ <u>https://www.youtube.com/</u> watch?v=CUnTVIX5yc4	The bats are on parade. The different sections of the band come in arrays of 1x1, 2x2, 3x3to 10x10. When they are altogether there are 385 bats on parade	Counting and cardinal number values Multiplication Arrays Square numbers to 100 Addition to 385 This introduces the idea of square numbers up to 10 x 10 through arrays. Children could count in ones or by rows. Eventually all of the bats are there, providing older children with a challenge to calculate how many bats there are altogether (385).

100 5-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0	Count to 100 Felicity Brooks & Sophia Touliatou 3 to 7 <u>https://www.youtube.com/</u> <u>watch?v=xKweha35UXg</u> (quick overview only)	This picture book introduces counting to 100 in tens. There are large numbers of cars, swirling leaves raindrops and stars to count in groups.	Counting and cardinal number values to 100 Ordinality - number order Counting in 10s Numerals This involves counting to 100, beginning with numbers to 10 and then increasing in 10s to100. Most displays are grouped in 5s and 10s, but not all. Some items are missing so children are encouraged to count and check (e.g. that there are 7 flowers in each of ten rows).
How Big is a Million?	How big is a million? Anna Milbourne & Serena Riglietti 3 to 7 <u>https://www.youtube.com/</u> watch?v=uIQXLKyfYwY	The little penguin wants to know how big a million is. He finds ten fish, a hundred penguins in a huddle and a thousand snowflakes There are no numerals, but a fold-out poster of a million stars.	Cardinal number values of large numbers Ordinality - number order Young children will be excited by the big numbers and by learning how many zeros are needed to write these. Older children could find number symbols for numbers over 10, e.g. by using a calculator and repeatedly adding 10,100, 1,000 or 100,000. A class of children can make a large number together: if they make five playdough penguins or 10 paper stars each, they can count them all up. If other classes did the same, there would be a lot!

TALKING MATH CHRISTOPHEN DANIELSON WWW.WANDER	How many? A counting book Christopher Danielson 3 to 7 How Many? A Different Kind of Counting Book Author demonstrating with children: https://www.youtube.com/ watch?v=i6GkoQMyJAs	A book of photos of everyday things, with lots of counting opportunities up to 24 and beyond	Counting and cardinal number values to 24 + Children decide what to count on each photo: numbers can vary depending on the child's criteria. This gives children more flexibility and choice than most counting books as to what to count, and may help to encourage their 'spontaneous' focusing on numerosity'.
	How many jellybeans? by Andrea Menotti & Yancey Labat 5 to 7 <u>https://www.youtube.com/ watch?v=cJpgK1QCY9g</u> (with teacher asking questions)	Emma and Aiden compete with each other to say the ever increasing number of jellybeans they would like, up to a million.	Counting and cardinal number values Ordinality - number order to a million Numerals Composition Quantities like ten thousand, and even a million, are illustrated in jellybeans and often regrouped, for example, to show that eating a thousand beans a year would be about 3 a day. Varied numbers are represented on one spread, which helps children to begin to compare and get a sense of these large numbers.

			Counting in 2s, 5s and 10s
	How many seeds in a	Mr. Tiffin's class	Ordinality: number order to 350

			own questions to ask their friends.

Helen Nicoll and Jan Penkowski	Meg's eggs Helen Nicoll & Jan Pienkowski 3 to 5 <u>https://www.youtube.com/</u> watch?v=FWQOM4C_vl0	Meg makes a spell with various creatures to produce 3 eggs for supper. They turn out to be huge and too hard to eat. In the night they start to hatch and out come . DINOSAURS!	Ordinality - number order: counting from 98 Subitising 2 and 3 This is mostly focused on 3 as the eggs hatch into dinosaurs, but then the stegosaurus eats 98, 99,100 - and more - cabbages. Children could explore counting beyond 100: 101, 102, by using +1 on a calculator. A simple game involves toy dinosaurs throwing dice to collect cabbages to eat (lots of green card circles or gems on a field- e.g. 10 x 10 squared paper). Children could also explore the composition of 3 and other numbers, using spell ingredients or eggs and dinosaurs.
MORE, FEWER, LESS TANA HOBAN	More, fewer, less Tana Hoban 2 to 5 <u>https://www.youtube.com/</u> <u>watch?v=gjLefyK6b64</u> from 1:19 to end	This wordless photobook contains clear pictures of different kinds of things to compare e.g. hens, scissors, shells.	Estimating more or fewer Counting and cardinal number values Children are invited to estimate, count, compare and also ask their own questions, with different size groups of varied things. The YouTube video gives many suggestions of questions you could pose and discuss.

One Grain of Rice Demi	One grain of rice Demi 5 to 7 <u>https://youtu.be/_CdAXY</u> <u>U_LYs</u> Also available in Japanese.	An Indian folk tale of a clever village girl outwitting a selfish raja, showing how doubling for 30 days results in a billion grains of rice. There are beautiful illustrations in the style of Indian miniatures.	Counting and cardinal number values Ordinality- number order to a billion Doubling Arrays The story has the 'wow' factor of big numbers and some lovely arrays of pack animals to count. A chart at the end shows the number pattern: older children could try doubling from one, doubling numbers of hundreds, thousands and millions, or use a calculator and try reading the numbers. There is also a message about how knowing maths can help poor people.
HUNDRED HUNDRE	One hundred hungry ants Elinor J. Pinczes & Bonnie MacKain 3 to 7 <u>https://www.youtube.com/</u> watch?v=KXLNe5zfrvc Also available in Chinese	100 ants are in a long file then group themselves in different ways in order to reach the picnic faster. They start with two rows of 50, and eventually make10 rows of 10.	Counting to 100 and to 50, 25, 20 Counting in 10s Multiplication and composition of 100 Arrays Children can check the numbers in the pictures, by counting the number of ants in each row, and count to 100 in tens. They could make 10 groups of 10 things and check there are 100 altogether. Older children could investigate composing numbers like 12 and 18 in different ways using equal rows to make arrays.

			Counting and cardinal number values to 20

Laureh Child	<i>One thing</i> Lauren Child	Top negotiator Lola takes on numbers in everyday life and	Counting and cardinal number values Ordinality - number order of large numbers Numerals Calculations
Provide and Lola Charlie and Lola	4 to 7 <u>https://www.youtube.com/</u> <u>watch?v=WP8yOo8tErg</u>	endearing and unique will. A classic Charlie and Lola picture book from Children's Laureate Lauren Child.	Time, assorted numerals and number words, and a range of calculations feature throughout. Inside the front cover, Lauren Child talks about numbers and how they are written. This is great for recognising children's fascination with counting and large numbers, and especially good for discussion with a small number of children. There are lots of addition and subtraction calculations that could be recreated and checked out with manipulatives such as bead strings.

	<i>Ready, set, 100th day!</i> Nancy Elizabeth Wallace 4 to 7 <u>https://www.youtube.com/</u> <u>watch?v=rXEeeRGWY04</u>	It's the 100th Day of school and Mina wants to find a fantastic example of 100 things to take to school. With the help of her family, she finds a number of different ways to count to 100, before she decides on a creative way to make	Counting in 5s, 10s, 20s, 25s, 50s Cardinal number values to 100 Ordinality- number order Composition There are opportunities to count to 100 in 6 different ways (in 5s, 10s, 20s, 25s & 50s) with a focus on counting 10 lots of 10. Children could make their own sets of 100 for the 100th day of school.
JULIA DONALDSON - SEBASTIEN BRAUN	<i>Spinderella</i> Julia Donaldson 3 to 6 <u>https://www.youtube.com/</u> <u>watch?v=Qjgp3YiaKJw</u>	100. Spinderella is a spider in a family which sees no use for numbers. She finds they are useful for making equal teams for football and many other purposes. (Changing the name of the school to your school ensures engagement.	Counting and cardinal number values to 20 Numerals Counting equal groups This involves counting to 20 in ones and in two groups of 10, as well as smaller numbers. It shows the need for numbers in different situations like <i>How many goals?</i> or <i>How many football boots?</i> You could create different outdoor games with the children and let the children take the role of organising teams and ensuring that these are equal.

SURROUNDED BY NUMBERS	Surrounded by numbers Latoshia Martin Illustrated by Vera Sysolina 4 to 6 <u>https://www.youtube.com/</u> watch?v=zhi_oPWg-kU	An African American family get ready and go to some different shops. This shows some different contexts for numbers in everyday life. The final spread shows images for numbers to 20.	Counting and cardinal number values to 20 Ordinality - number order Numerals Contexts for numbers This has several examples of cardinal and ordinal numbers, e.g. the numbered aisles in the supermarket. There are opportunities for counting and recognizing quantities and numerals up to 20. Children could make their own version of the display of images for numbers to 20.
	<i>The great race</i> Emily Hiles 3 to 5 <u>https://www.facebook.co</u> <u>m/watch/?v=7206838126</u> 50001	This is a rhyming version of the classic story about the naming of the Chinese Zodiac years: the order of animal names (up to12) is decided by where they came in the Great Race: Rat is 1, Ox is 2 and so on.	Ordinality - number order to 12 Numerals This is about the order of numbers to 12, linked to animal names. Children can act out the race with toy animals or pictures and give them each their numeral, in order. (See <u>Mathematical Moment</u>) They could spot errors in the order and sort out muddles. Children could also create their own order with different animals and add creatures with numerals beyond 12.

		This is a story about	Counting and cardinal number values to 512
	Uno's garden	how we change the	Ordinality - number order

Books focusing on composition		Description	Developing the maths
Parameters Bandwart B	1 smile 10 toes Nelleke Verhoeff 3 to 7 <u>https://www.youtube.com/</u> <u>watch?v=81HagFUmZmc</u>	A 'mix & match' board book with split pages. Turning one part of the page produces new mixed up creatures. So you can make silly creatures with different combinations of features, such as 3 beaks & 8 toes, or 4 arms & 1 bum! This book also helps children to learn the names of human and animal body parts.	Counting and cardinal number values Subitising Numerals to 10 Number combinations up to 20 Children can count to check the number of a particular feature or add them to find the total on the page, up to 20. Children could also find or make creatures with a given total e.g.10 features – or the smallest and largest numbers. They could also find creatures on facing pages with the same total number of features: e.g. a crocodile with 10 teeth and 7 scales faces a bird with 9 spikes and 8 toes, or they could make a creature with 6 eyelashes and 6 wings facing one with 8 pigtails and 4 knees, both totalling 12.

DOGS Culy Crivett	10 dogs Emily Gravett 5 -6 <u>https://www.tiktok.com/@</u> <u>thereadingrainbow/video/</u> <u>7303639182247939374</u>	There are 10 dogs and 10 sausages. To start, 1 dog has all the sausages, and gradually the number of dogs with sausages increases by one until every dog has one sausage each.	Counting and cardinal number values Ordinality - number order One more Numerals Composition of 10 Children could predict the next number of dogs to have or not have sausages each time. They could show the pairs of numbers making 10 on their fingers and spot the increasing and decreasing patterns. They could also act out the story with 10 soft toys and 10 dog biscuits, or choose another number of toys and food items.
TO GET TO HIL WAYS TO GET TO HIL WAYS TO GET TO HIL WAYS TO GET TO HIL WAYS TO GET TO HIL WAYS TO GET TO HIL WAYS TO GET TO HIL HIL HIL HIL HIL HIL HIL HIL	12 ways to get to 11 Eve Merriam 5 to 7 <u>https://www.youtube.com/</u> <u>watch?v=rJJ1HhSv4LY</u>	A range of scenes show different ways to make a total of 11, using very varied things, including bites of an apple and triplets, as well as pine cones and acorns.	Counting and cardinal number values to 11 Subitising Adding by counting on Number combinations for 11 This shows combinations of several numbers making 11, so children need to count or add cumulatively to check, by counting on or using number bonds. Children could record their own ways of making 11 with lots of different things.

MATHEMATICIAN LIKE DE SHARE	<i>A mathematician like me</i> Shini Somara 5 to 8 No video currently available	On a strikingly illustrated camping adventure, Aliyah discovers that numbers are everywhere: counting money at the shops, planning trips by train and stargazing in a forest.	Problem solving Reasoning Composition This introduces children to maths in everyday life and problem-solving. As well as solving calculations, Aliyah learns about the brilliant mathematicians who have helped us understand our world.
Anno's Counting Book	Anno's counting book Mitsumasa Anna 2 to 7 <u>https://www.youtube.com/</u> watch?v=tPe2vvbXCWo	The book begins with 0, showing a barren wintry landscape. It continues with opportunities to count buildings, people, trees and other objects in different arrangements within a scene which is developed through the seasons.	Counting and cardinal number values Numerals Ordinality - number order One more Composition This emphasises the cardinal values for numerals with many different objects and encourages checking and searching to find the given number. (And there are not always the given number of each item e.g. windows). Items are variously grouped, showing the different ways each number can be composed.

Baby goes to Market	Baby goes to market Atinuke Illustrated by Angela Brooksbank 3 to 5	The sellers give Baby things to eat without her seeing. Each time he eats one and puts the rest in the basket. Mama is surprised by how heavy her basket	Counting and cardinal number values Ordinality - number order: counting backwards One less / subtracting one The sellers give Baby 6 bananas, 5 oranges and so on. The challenge is to predict how many things he will put in the basket after he has eaten one each time: children could hold up their fingers to show
ANADES - ANGELA BROOKSBANK	https://www.youtube.com/ watch?v=WwmgTNzGB_ o	has become.	this. There are no numerals so children could identify these. The decreasing numbers of items given and remaining also emphasise counting backwards e.g. 5,4,3,2,1 extra things.
Fish Eyes	Fish eyes – a book you can count on Lois Ehlert 3 to 5 https://www.youtube.com/	Counting up to 10 eyes (holes in the pages) of different kinds of fish – bright, darting, stripy, spottyand adding one more.	Counting and cardinal number values to 10 Subitising Numerals Ordinality - number order One more / adding one Both numerals and words are displayed, with 'plus me' used to add the little fish on each page.
Lois Ehlen	watch?v=3YWKHo1BghI		Children might count to check the number of fish. You could make subitising cards using the fish. Children could add one more with a 'plus me' fish card or 'plus' other numbers.

How Many Feet In The Bed?	How many feet in the bed? Diane Johnston Hamm Illustrated by Kate Salley Palmer 4 to 7 <u>https://www.youtube.com/</u> <u>watch?v=w8UtWbgjPc0&</u> <u>t=102s</u>	A little girl wants to know how many feet are in the bed. As more and more family members get into bed, the number increases and as they leave, the number of feet decreases.	Counting and cardinal number values to 10 Ordinality - number order Counting forwards and back in 2s Adding / subtracting 2 at a time Jane counts the feet one by one, then when she reaches ten she counts again in twos. As family members get out of bed, Jane counts down in twos. Children can count along and predict the next number. Children could make increasing and decreasing staircase patterns with pairs of footprints.
KES GRAY & JUM FIELD	How many legs? Kes Gray 3 to 7 <u>https://www.youtube.com/</u> watch?v=anVfvq-T-J0	This uses a party context where different creatures arrive, including polar bears and squid, creating different numbers of legs. Thankfully, the long addition calculation and the answer are on the last pages of the book.	Counting and cardinal number values Adding Children are invited to predict How many legs there will be as various combinations of 2, 4, 6 and 8 legged creatures arrive? – and don't forget the table! Children will enjoy counting legs and predicting the total, finding strategies to check. The animals could be pictured on individual cards. You could tell the children how many legs you can see, and they then select a combination of animals e.g. <i>I can see 2 animals and 10 legs</i> . Children also enjoy drawing their own party combinations of legs.

eaping Litards	Leaping lizards Stuart J. Murphy. Illustrated by JoAnn Adinolfi 4 to 7 <u>https://www.youtube.com/</u> watch?v=USK-3jkw0wk	The show cannot start until the 50 leaping lizards all get there. They come in in fives and tens in different ways (swimming, trucks, air balloons).	Counting and cardinal number values to 50 Ordinality - number order Counting in 5s and 10s Subitising groups This provides a context to count in 5s and 10s up to 50. It provides opportunities for conceptual subitizing based on fives. Children could make their own groups of five objects (e.g. sticks) and count in 5s and 10s.
Maisy Goes Camping	Maisie goes camping Lucie Cousins 4 to 6 <u>https://www.youtube.com/</u> watch?v=tQnSv2v4PvI	Maisie and four friends, including Eddie the elephant, try and fit in a tent, but find that five is a squeezy squish-squash.	Counting and cardinal numbers to 5 Ordinality - number order One more / adding one Composition This provides a useful context for posing problems about how many of the five could be inside and outside the tent. Children can play this as a game in pairs, with a folded card tent and toy animals, challenging each other to work out the number still hidden in the tent. Children might use different subtraction strategies, including visualising, modelling on fingers or number bond recall.

Mouse Count	Mouse count Ellen Stoll Walsh 3 to 5 <u>https://www.youtube.com/</u> <u>watch?v=oA5QeZhDJEs</u> Also available in Spanish	A hungry snake collects sleepy mice into a jar, adding on each time, but the mice trick him and escape, 'uncounting' themselves.	Counting and cardinal number values to 10 Ordinality - number order: counting back Adding by counting on The snake demonstrates adding by counting on. Children can use this strategy by adding their own numbers of toy mice or pebbles into a jar and count back as they remove numbers of 'mice'. This video from the Erikson website shows two ways of developing the story, large scale and small scale: https://earlymath.erikson.edu/mouse-collections-
			preschool-storytime-game/
Crab Crab Crab Crab Crab Crab Crab Crab	One is a snail, ten is a crab April & Jeff Sayre 3 to 7 <u>https://www.youtube.com/</u> watch?v=zDjp7rTXtsk	A counting by feet book: a snail has one foot, a person has 2, a dog has 4, crabs have 10 So 40 can be made with 4 crabs or 10 dogs.	Counting and cardinal number values to 100 Adding combinations of 2s, 4s, 10s etc Counting in 10s Composition Problem solving Children can make numbers to 20 with say, snails people and dogs - or make other numbers with other creatures. You could provide animal pictures or toys and invite children to make numbers in different ways using the animals e.g. <i>How many</i> <i>ways can you show eight feet?</i> Children could record their combinations in their own ways. Very young children also enjoy the book: see <u>Mathematical Moment One is a snail</u>

Petethe Cat and His Four Groovy Buttons	Pete the cat and His four groovy buttons Eric Litwin 2 to 5 <u>https://www.youtube.com/</u> <u>watch?v=dR5N1Z7KN8Y</u> With a groovy song!	Subtracting one from 4, then 3, then 2, then 1 to 0 as Pete the Cat loses his buttons one at a time.	Counting and cardinal number values to 4 Numerals Ordinality - number order: counting back One fewer / subtracting one As Pete loses one after another of his buttons, the relevant numeral, number word and subtraction equation are all shown. Children can model the action with their own set of 4 buttons, and then other numbers.
QUACK and DUACK ELTH BAREA	Quack and count Keith Baker 2 to 5 <u>https://www.youtube.com/</u> <u>watch?v=qyFWbhR7MO</u> <u>A</u>	Seven lively ducklings regroup themselves to show various number pairs for 7 as they get ready to fly for the first time.	Counting and cardinal number values to 7 Subitising Ordinality - number order: forwards and back Composition of 7 Children can follow the 7 ducklings as they group and regroup themselves. The number pairs for 7 are shown systematically in order, from '6 plus 1', '5 plus 2' etc. to'1 plus 6'. Children could model the decreasing and increasing number patterns with objects. Children could make up their own number stories with a set of toy ducks and a paper pond. e.g. There are 5 ducks swimming on the pond and 2 ducks sitting on the nest or the bank.

spiAshi	Splash Ann Jonas 4 to 7 <u>https://www.youtube.com/</u> <u>watch?v=TUg_DEw_GV</u> <u>A</u>	There are 10 creatures, fish, frogs, turtles, a cat and a dog, and a pond. Different numbers fall in and climb back out, often simultaneously. So the question constantly recurs 'How many are in my pond?'	Counting and cardinal number values to 10 Subitising Adding and subtracting Problem solving Children can count, or use a range of adding and subtracting strategies, to find out how many creatures are in the pond at any time. As some fall in at the same time as others are climbing out, there are some interesting problems involving inverse operations
Ten Black Dots DonaldCrews	Ten black dots Donald Crews 3 to 7 <u>https://www.youtube.com/</u> <u>watch?v=uPJEqUB2CxA</u>	Clear and engaging images of numbers from 1 to 10, made from black dots on various objects and in different arrangements.	Children could also make up their own 'Splash!' stories, with different numbers and creatures. Counting and cardinal number values to 10 Ordinality - number order Numerals Subitising Composition Children can count or subitise dots from 1 to 10, and recognise different compositions of the numbers. A final staircase pattern shows numbers 6 to 10 as '5 and some more '. Children could make their own staircase patterns with different objects and create triangular numbers to 15.

T in the bed Hand determine the rest of the ball	<i>Ten in the bed</i> David Ellwand 3 to 6 board book	The classic rhyme, with photos showing how many bears have fallen out of bed as well as those still in bed. There are numerals for the number of teddies in bed at each stage, but not for the teddies out of bed.	Counting and cardinal number values to 10 Subitising Ordinality - number order: forwards and back Composition Children can subitise or count to say how many bears have fallen out of bed. You could cover up the side section of the page and challenge children to say the number, then reveal to check. This also provides opportunities to play games with bed and teddy props, where only those out (or in) are visible and children have to say the other number. They can also spot the pattern and predict the increasing and decreasing numbers of teddies in and out of bed.
The Doorbell Rang by Pat Hutchins	The Doorbell Rang Pat Hutchins4 to 7https://www.youtube.com/ watch?v=A-tqjCPnHLgAlso available in Spanish	Ma makes a plate of delicious cookies for her two children to share. But then the doorbell rings—again and again. Each ring of the doorbell brings more friends to share the cookies- until the final doorbell ring	Division as equal sharing Composition of 12 With the repeated ringing of the doorbell, the children's share of the cookies decreases from 6 to 3 to 2 to 1 each. This is a lovely story to act out with a baking tray and 12 salt dough cookies, making equal groups and showing how sharing between more people means fewer cookies each.

Great Pet Sale	<i>The great pet sale</i> Mick Inkpen 3 to 7 <u>https://www.youtube.com/</u> <u>watch?v=O9ikTU9ir2s</u>	A lift-the-flap book with charming illustrations of depressed pets, all priced from 1p to 10p, (except the dragon for 25p).	NumeralsAddingMoneyCompositionPrices are shown to 10p, then 25p - and £1 as the total for all the pets in the sale.Children could select combinations of creatures to buy for a given amount e.g. What could you buy for 15p? They could use pennies or other coins to match the prices of animals and count or use different strategies to add.
John Burningham The Shopping Basket	The shopping basketJohn Burningham3 to 6https://www.youtube.com/watch?v=s_HYKelQG6YAlso available in French	Steven goes to buy 6 eggs, 5 bananas, 4 apples etc. One of each item disappears as he meets various threatening animals. The whole collection of 21 objects is shown in a triangular arrangement	Counting and cardinal number values to 6+ Subitising Ordinality - number order One fewer / subtracting one Triangular numbers Number words are used throughout, so children could find the matching numerals. As one item is removed from each number to 6, children can work out the number remaining. They could also explore other triangular number arrangements, for 6, 10 and 15.

Guidance

Sharing books with children is an important way of fostering positive attitudes to mathematics. Books are important in their own right and should be enjoyed for their own sake. It is useful for adults to be aware of the possible mathematics opportunities, and then use their own judgement when best to take advantage of these. There are a range of approaches for using picture books for maths with children. You may:

- read, see what children notice and discuss
- read the book a few times before discussing any maths
- pose a few questions, invitations to show fingers etc., but don't ruin the story!
- provide props for re-enactment, through small world or role play
- invite children to make up their own versions
- make up a game (e.g. collect cabbages for the dinosaurs in *Meg's eggs*, or make a track for the *Shopping basket*)
- set a challenge (e.g. collecting creatures with 12 feet altogether from *One is snail, ten is a crab*)

Photograph: Sharon Palfreyman

In the photograph, 'Mouse count' has been developed into a nursery game where children throw soft toy mice into the snake's pot and then count them.

*Mathematical terms explained:

Ordinality is the concept of number order- this includes:

- **counting** by reciting the number sequence
- **ordinal numbers** -used to identify positions e.g. house and page numbers: We're at number 14, where is number 6? We've gone past it – how far back was it?
- knowing the further you count, the 'bigger' the number, and if you count back, the numbers get smaller
- ordering numbers e.g. putting 9, 2, 6, 11 in order
- placing numbers on an 'empty' number line: the relative position of the numbers indicates their size and distances between them relate to differences in number size
- understanding number lines and measuring scales, such as height charts

Cardinality is about **number values**, the 'how many-ness' of numbers:

- e.g. the 'three-ness' of three, the 'hundred-ness' of 100
- **cardinal numbers** are used to indicate how many there are e.g. *there's 14 people and 6 chairs - we need to get some more!*
- **counting objects** knowing the last number you say tells you how many there are (this is the cardinal counting principle)
- subitising means recognising 'how many' without having to count this helps children learn cardinal numbers

Numerals are number symbols e.g. 2, 7, 10, 100 as distinct from number words, like two, seven, ten or a hundred.

NB lots of everyday numerals are unrelated to number order or values but are measures (e.g. prices) or labels (e.g. bus numbers)

Composition is about numbers being made up of other numbers:

- you can add two or more numbers to make a number e.g. 2 & 3 make 5; 1 & 2 & 3 make 6
- a number can be made up of various combinations of smaller numbers e.g. 5 can be made with 2&3, 4&1, 2&2&1 etc.
- understanding composition of numbers helps to see addition and subtraction as related (inverse operations) e.g. if 2&3 make
 5, then 5 take away 3 leaves 2
