

10 for 10 webinars

To celebrate our 10 year anniversary, the Early Childhood Maths Group are presenting 10 free webinars, to share all that we've learned about helping children to develop confidence, competence and enjoyment in early maths.

The next ECMG webinar, 'Creating a nation of maths lovers' is on Tuesday November 3rd at 4- 5pm

Presenters: Dr Cath Gripton, Janine Davenall and Rachel Odeniyi

Maths can sometimes be perceived as difficult, boring and only for 'maths people'. ECMG believes that all young children can develop a love of maths and they provide advice and resources to educators and families to help achieve this. In this webinar we explain why creating a nation of maths lovers is important and how we can each support this mission. It provides practical ideas for making schools, settings, home and community spaces more mathematical, encouraging deep mathematical thinking and enjoyment of maths in adults and children.

This is followed by

'Mathematical learning through blockplay', Thursday Nov 19th 4-5 pm

Presenters: Dr Andrea Lancaster, Maureen Hemingway, Dr Charis Voutsina, Dr Penny Lawrence

In this webinar we will be showcasing the new ECMG Block Play progressions and guidance, thinking about how it might be used to support provision and practice, in order to develop mathematics. We will also be sharing examples of practice and practical tips.
